Dear

Predicting 5-aminosalicylate induced nephrotoxicity in patients with inflammatory bowel disease.

Thank you very much for your interest in our study which aims to identify genes (the basic building blocks of life) which determine kidney damage caused by 5-aminosalicylate drugs. If you have Crohn's disease or ulcerative colitis and have experienced kidney damage whilst taking a 5-aminosalicylate drug then you might be eligible to take part. We would be grateful if you would carefully read the enclosed information sheet about the study.

If you would like to take part then please complete the reply slip and study questionnaire and return both in the prepaid envelope to IBD Research Office, Royal Devon & Exeter NHS Foundation Trust, Barrack Road, Exeter EX2 5DW. If you would like help completing the forms then please feel free to contact XXXX the research administrator by telephone (01392 40XXXX) or e-mail (research.assistant@rdefn.nhs.uk). We will contact you by phone to arrange a visit from a research nurse.

If you do not wish to take part in the study, please feel free to say by phone, e-mail or letter - it will not affect your medical care or treatment in any way

With best wishes

Yours sincerely

Insert name of PI

Please complete this form and return to the Exeter Research Office in the enclosed pre-paid envelope.

I would be / would not be prepared to take part in the research programme.
