

Consent Form (16-18 yrs)

Predicting 5-aminosalicylate induced nephrotoxicity in patients with inflammatory bowel disease.

Researcher:

Please
initial
box

- 1. I confirm that I have read and understand the information sheet dated 30th May 2011 (version 4) for the above study and have had the chance to ask any questions.
- 2. I understand that taking part is voluntary and that I can chose not to take part in the study at anytime, without giving any reason, without my medical care or legal rights being affected.
- 3. I understand that sections of my hospital notes may be looked at by a doctor or nurses. I allow these doctors and nurses to have access to my records.
- 4. I understand that my DNA might be sent to other laboratories in the UK and USA for analyses but my personal details will remain confidential
- 5. I understand that my DNA and blood will be stored to be used in future studies like this one studies aimed at understanding the genetic factors involved in Inflammatory Bowel Disease. All such future studies will require approval by an ethics committee.
- 6. I understand that if I later am unable to give consent (if I was ill) I will be withdrawn from the study. No further data or tissue would be collected or any other research procedures carried out but DNA and blood collected prior to the onset of the illness may be retained and used confidentially in this and future IBD genetic research studies.
- 7. I agree to take part in the above study
